Avaira™ is made from a unique material that attracts and binds water within the lens itself, keeping lenses moist and comfortable.

- Breathability enables more oxygen to pass through the lens to your eye.
- Exceptionally breathable—to keep your eyes clear and healthy looking.
- CooperVision’s exclusive Aquaform® Comfort Science™ equals softer, more flexible lens material.
- Available for nearsightedness, farsightedness and astigmatism.

Biofinity® is a high-performance silicone hydrogel soft lens which utilizes Aquaform® Comfort Science™, an innovative material that provides many benefits, including:

- High oxygen performance, helping to keep eyes white and healthy.
- Soft and moist lens material for excellent all-day comfort.
- Available for nearsightedness, farsightedness and astigmatism.
- Extended wear approval

Proclear® utilizes PC Technology™, a unique material with molecules that attract and surround themselves with water, keeping lenses moist and comfortable.

- The comfort and convenience of daily disposable lenses.
- Keep that “fresh lens” comfort—even after 12 hours of wear.
- Proclear brands are available for nearsightedness, farsightedness, astigmatism and presbyopia (contact lenses for reading).
